

iSmooth

Pure fruit, pure pleasure.

Granite

I-Smooth is the **first commercial machine** for the Ho.Re.Ca. market that **dispenses refreshing and delicious smoothies within seconds.**

It's a real revolution: combining the **I-Pro slusher advanced technology** with the powerful **blendtec** technology.

The result is a machine that makes real frozen smoothies, delivering a delicious, refreshing and healthy drink with a unique texture.

Gas	R 404 a/R 290
Dimensions (WxDxH)	46x65x90 cm
Net Weight	76.5 Kg
Standard Voltage	230/50V/Hz
Absorption	1680 Watt
Standard Colours	black

MADE IN ITALY

Features

I-Smooth is **equipped with I-Tank™, the exclusive insulated bowl patented by SPM Drink Systems:** thanks to its double wall, increases the machine cooling power and **counteracts heat exchange between product and ambient.**

The unique I-Tank bowl reduces condensation on the external part of the bowl, providing a more attractive look.

The clever design and practical handle on the front of the bowl allows **easy removal, handling and cleaning.**

The innovative dispensing zone has been designed to **switch the blender unit on only when required**, thus ensuring a **freshly blended product, thanks to the patented blendtec® technology.**

I-Smooth is user-friendly: **two led lights** located just below each bowl will inform you about the **readiness of your product.** Green light stands for "Ready", red light stands for "Not Ready".

The machine is also equipped with a mechanical timer which is used to set **the defrost mode** that keeps the product chilled & fresh during the night. User can change **the texture of the smoothie** from the back panel of the machine.
