GT TOUCH 1

GT Touch

5 products in one touch

GT TOUCH 2

Electronics, **design** and **technology** are combined in a single unit that is ideal for convenience stores, take-away shops, bars, restaurants and cafes.

The GT Touch can be **pre-programmed** to dispense up to 5 products and is easy to use thanks to its exclusive interactive touch screen. Soft serve ice cream, frozen yoghurt, chilled coffee cream, thick shakes, frozen juices or slush – the GT Touch provides maximum **flexibility**, allowing it to deliver the most appropriate product according to the time of the day.

GT Touch comes with HACCP certification. It is available in one or two bowl configurations and it comes in black or white with stainless steel finishing.

Functions with water/milk added to products for ice cream, slush, cream, sherbet or with ready to use mixed product base. Tanks work independently. Lockable lid. Always read the user's manual.

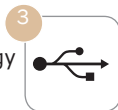

Features

- The GT Touch is the most flexible model in the GT range.
- You can pre-program up to 5 different frozen product offerings.
- At a touch of the screen you can select the required product to dispense.
- The desired temperature and auger speed at preparation, maintenance and dispensing stages can be pre-programmed for each product. This feature guarantees the delivery of a consistent product every time. The I-TANK™ Technology prevents ice accumulation on the outer side of the bowl.
- For large volume equipment orders, the touch screen can be customised to suit your requirements.
- GT Touch is a simple and reliable unit. It is designed to operate with water or milk-based product.
- It is capable of producing a significant over-run ensuring a high return on investment.
